

SY Coho

Hard Red Spring Wheat Variety
High Production Hard Red Spring

Highlights

- Adapted to high moisture or irrigation, with medium height and maturity
- Excellent protein
- Good tolerance to current strains of stripe rust and Septoria
- Good option for fall-planted DNS production

Agronomics

Maturity	Medium to late
Test Weight	Below average
Seed Size	Medium
Height	Medium
Straw Strength	Good
Head Type	Awned
Tillering	Good
Planting Date	Average
Emergence	Average
Protein	Good
Fall Planted	Good

Disease and Pest Tolerance

2016-2018 Hard Red Spring Over Locations Average Summary

Variety	Yield — Percent of Average				TW 3-Yr Avg lb/bu
	3-Yr Avg	2018	2017	2016

Note: these agronomic assessments are made by Syngenta scientists and reflect each variety's relative performance within these characteristics though the 2018 crop year. Specific conditions may cause variations within characteristics. These relative protection values are based on current pest and disease populations and have been known to shift periodically and may cause changes in specific evaluations. Resistance to many other diseases and pests is sensitive to environmental conditions, plant development stages and the presence and intensity of other diseases which may result in specific evaluation inconsistencies. This chart is updated annually to reflect the most current trends. ©2018 Syngenta. PVPA 1994—Unauthorized propagation prohibited. Plant variety protection granted or applied for Syngenta varieties.
