GENERAL:

- 1 = Excellent
- 2 = Very Good to Excellent
- 3 = Very Good
- 4 = Very Good to Good
- 5 = Good
- 6 = Fair to Good
- 7 = Fair
- 8 = Fair to Poor
- 9 = Poor
- = Not available

Plant Height:

- 1 = Shortest
- 9 = Tallest

Note: these agronomic assessments are updated annually by Syngenta scientists. The current values reflect each variety's relative performance within these characteristics through the 2018 crop year. Specific conditions may cause variations. These relative protection values are based on current pest and disease populations, known to shift periodically potentially changing specific evaluations. Resistance to many other diseases and pests is sensitive to environmental conditions, plant development stages and the presence and intensity of other diseases which may result in specific evaluation inconsistencies.

* Everest has a fusarium head blight (FHB) rating of four.

Varieties that lead the industry.
And lead you to better yields.

Winter Wheat Seed Guide

SY Grit

Straw Strength and Drought Tolerance

- The best straw strength in our lineup
- Excellent yields—irrigated and dryland
- Medium early maturity
- Good disease package
- Performs well for wheat silage
- AgriPro® brand variety PostRock parentage

SY Rugged

The Dryland Performer

- High yields across environments
- Very good test weights
- Good rust tolerance—leaf and stripe
- Good drought tolerance
- Earlier maturity

SY Achieve CL²

Earlier Maturity Two-Gene

- Two-gene herbicide tolerance with very high yields
- Early maturing variety
- Good quality and test weight
- Good stripe rust resistance

Bob Dole

Leading Rust Resistance

- Very good rust tolerance—leaf and stripe
- Consistent performance over years
- Excellent end-use quality
- Fusarium head blight tolerance

SY Sunrise*

Wake Up to a New Yield Level

- Highest yielding AgriPro® variety under irrigation
- High tillering, semi-dwarf plant type with good straw strength
- Good disease tolerance to stripe, leaf and stem rusts
- Excellent test weights with good winter hardiness

** SY Sunrise requires a Seed Stewardship Agreement specifying No Saved Seed. Using Certified Seed every crop season provides growers the best opportunity to maximize the yield potential of the variety.*

SY Benefit

Fusarium Head Blight Tolerance

- Our best yielder in the east
- Very consistent yields in the I-35 corridor
- Good mill and bake quality
- Medium maturity, good aluminum tolerance for low pH soils

SY Legend CL²

The Legend Starts Now

- Drought tolerance
- Consistent yield performance across the western region
- Excellent test weight pattern
- Good leaf and stripe rust tolerance

AP503 CL²

Proven Two-Gene Performer

SY Wolf

The Heavy Residue Champion

Spur

Solid Stem for Wheat Stem Sawfly Protection

SY Monument

Disease and Drought Tolerance

- #1 — Planted on more acres than any other wheat variety in the Plains
- Ideal choice for double crop following soybeans
- Tolerance to acid soils and soil borne mosaic virus
- Good winter hardiness
- Very good tolerance to leaf and stripe rust

SY 517 CL²

Winter Hardy Two-Gene

- Excellent test weight pattern
- Good straw strength
- Moderate tolerance to fusarium head blight
- Good winter hardiness
