

SY Raptor

Soft White Winter Wheat Variety
Powerful Performance Potential

Highlights

- Bred for high production regions of the Pacific Northwest
- Medium to short height
- Good straw strength for irrigation
- Good high temperature adult plant tolerance to stripe rust

Agronomics

Maturity	Medium
Test Weight	Average
Seed Size	Medium
Height	Medium
Straw Strength	Good
Head Type	Awned
Planting Rate	1.5M seeds/a
Planting Date	Average
Emergence	Good

Disease and Pest Tolerance

2016-2018 ≥16” Moisture Average Summary

Variety	Yield — Percent of Average				TW 3-Yr Avg lb/bu
	3-Yr Avg	2018	2017	2016

Note: these agronomic assessments are made by Syngenta scientists and reflect each variety’s relative performance within these characteristics though the 2018 crop year. Specific conditions may cause variations within characteristics. These relative protection values are based on current pest and disease populations and have been known to shift periodically and may cause changes in specific evaluations. Resistance to many other diseases and pests is sensitive to environmental conditions, plant development stages and the presence and intensity of other diseases which may result in specific evaluation inconsistencies. This chart is updated annually to reflect the most current trends. ©2018 Syngenta. PVPA 1994—Unauthorized propagation prohibited. Plant variety protection granted or applied for Syngenta varieties.
