

SY Selway

Hard Red Spring Wheat Variety
Top HRS Choice for Dryland Acres

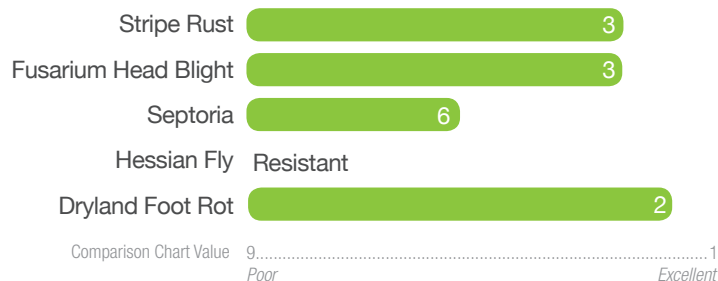

Highlights

- Very good yield potential in low to intermediate moisture production
- High protein and good quality
- Very good tolerance to current strains of stripe rust
- Hessian fly resistant

Agronomics

Maturity	Medium
Test Weight	Above average
Seed Size	Medium
Height	Medium-tall
Straw Strength	Good
Head Type	Awned
Tillering	Good
Planting Date	Average
Emergence	Average
Protein	Good

Disease and Pest Tolerance

2016-2018 Hard Red Spring Over Locations Average Summary

Variety	Yield — Percent of Average				TW 3-Yr Avg lb/bu
	3-Yr Avg	2018	2017	2016

Note: these agronomic assessments are made by Syngenta scientists and reflect each variety's relative performance within these characteristics though the 2018 crop year. Specific conditions may cause variations within characteristics. These relative protection values are based on current pest and disease populations and have been known to shift periodically and may cause changes in specific evaluations. Resistance to many other diseases and pests is sensitive to environmental conditions, plant development stages and the presence and intensity of other diseases which may result in specific evaluation inconsistencies. This chart is updated annually to reflect the most current trends. ©2018 Syngenta. PVPA 1994—Unauthorized propagation prohibited. Plant variety protection granted or applied for Syngenta varieties.
