

SY 576

Soft Winter Wheat Variety
Show Stopper

Highlights

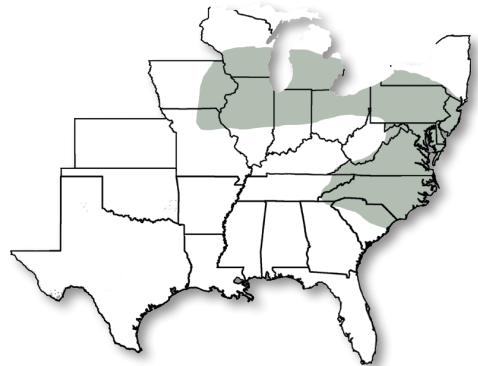

- Good package for Fusarium head blight (FHB) tolerance
- Large, awned head type
- Thick stem with great standability

Disease and Pest Tolerance

Agronomics

Maturity	Full season
Test Weight	Fair to good
Height	Medium tall
Straw Strength	Excellent
Head Type	Awned
Winter Hardiness	Very good
Planting Rate	Medium
Planting Date	Early to normal
Vernalization	Long

Area of primary adaptation

Note: these agronomic assessments are made by Syngenta scientists and reflect each variety's relative performance within these characteristics through the 2018 crop year. Specific conditions may cause variations within characteristics. These relative protection values are based on current pest and disease populations and have been known to shift periodically and may cause changes in specific evaluations. Resistance to many other diseases and pests is sensitive to environmental conditions, plant development stages and the presence and intensity of other diseases which may result in specific evaluation inconsistencies. This chart is updated annually to reflect the most current trends. Photos are the property of Syngenta or used under agreement. ©2019 Syngenta. Some or all of the varieties may be protected under one or more of the following: Plant Variety Protection, United States Plant Patents and/or Utility Patents and may not be propagated or reproduced without authorization.
