

# Spring Wheat

## **New!** SY McCloud

### Advancing Economic Return

SY McCloud is a great choice in North Dakota, Minnesota and eastern Montana. A high protein, well-rounded, high-return variety, it has consistent yield potential, very high test weight, medium-early maturity and the ability to stand.

## **New!** SY Longmire

### Solid Stem Built to Yield

Bred to combat wheat stem sawfly damage, SY Longmire is a broadly adapted, solid stem variety with high protein potential and a well-rounded disease package. SY Longmire has an SY Ingmar pedigree and excels in North Dakota, Minnesota, and Montana.

## **New!** SY 611 CL<sup>2</sup>

### High Yields with Herbicide Tolerance

If you are looking for a high yielding, herbicide tolerant spring wheat variety, look no further than SY 611 CL<sup>2</sup>. High yield potential, semi-dwarf height and two-gene herbicide tolerance with an SY Soren pedigree, SY 611 CL<sup>2</sup> is performing well from Montana to Minnesota.

## SY Rockford

### Rock Solid Returns in the West

Specifically developed for the western wheat acre. SY Rockford handles stress well, balances high yield potential with good protein for high returns per acre and has excellent Hessian fly tolerance. SY Rockford's large leaves have a growth habit that fills in wide rows fast, while maintaining very good foliar disease and fusarium head blight tolerance.

Area of primary adaptation

Variety	Agronomics			Disease and Pest						
	Test Weight	Protein	Maturity	Height	Straw Strength	Stem Rust	Leaf Rust	Foliar Disease	Fusarium head blight	Bacterial leaf streak
SY McCloud	2	3	4	6	4	1	3	4	4	5
SY 611 CL <sup>2</sup>	4	4	4	4	4	2	5	4	3	4

These agronomic assessments are made by Syngenta scientists and reflect each variety's relative performance within these characteristics through the 2019 crop year. Specific conditions may cause variations within those characteristics. These relative protection values are based on current pest and disease populations, which have been known to shift periodically and may cause changes in specific evaluations. Resistance to many other diseases and pests is sensitive to environmental conditions, plant development stages and the presence and intensity of other diseases which may result in specific evaluation inconsistencies. This chart is updated annually to reflect the most current trends.

**GENERAL:**  
 1 = Excellent or Best  
 2 = Very Good to excellent  
 3 = Very Good  
 4 = Very Good to Good  
 5 = Good

## The Most Planted Wheat Varieties in North Dakota in 2019

### #1 SY Ingmar

#### Top Choice for Economic Return

The most-planted wheat variety in North Dakota three years in a row, SY Ingmar has very high protein potential, broad adaptation, excellent standability and medium maturity for greater yield potential. SY Ingmar features a solid disease package and a SY Soren pedigree to round out what is the most complete variety the market has ever seen.

### #2 SY Valda

#### The Yield Warrior

Top-end yield potential from slightly later maturity and strong disease tolerance that keeps leaves green longer—extending kernel fill time—makes SY Valda an excellent complement when planting SY Ingmar and SY McCloud. SY Valda tillers well, handles most soil types and maintains moderate protein levels.

### SY Rowyn

High Yields with Excellent FHB Tolerance

### SY605 CL

Early Maturing, Herbicide Tolerant Spring Wheat

### SY Soren

Stands Strong for Maximum Returns

### SY Rustler

Yield + Protein = Maximum ROI

Winter Wheat

## SY Monument

### Disease and Drought Tolerance

- Widely adapted with good disease and drought tolerance across the Plains areas
- Good winter hardiness

## SY Wolf

### The Heavy Residue Champion

- Very high yield potential
- Semi-dwarf height

## SY Sunrise

### New Yield Levels on the Horizon

- Our highest yielding line in favorable conditions
- High tillering, semi-dwarf plant type with good straw strength

*SY Sunrise requires a Seed Stewardship Agreement specifying No Saved Seed. Using Certified Seed every crop season provides growers the best opportunity to maximize the yield potential of the variety.*

## SY Wolverine

### Tenacious Yields Across the Plains

- Outstanding yield potential
- Early/medium maturity with stiff straw
- Good wheat streak tolerance
