

AP Renegade

Hard Red Spring Wheat Variety
Breakthrough Performance

Highlights

- Widely adapted across moisture zones with medium height and maturity
- High test weight with good protein
- Hessian fly resistant with good stripe rust and Fusarium head blight tolerance
- Quick emergence and spring growth

Disease and Pest Tolerance

Stripe Rust 3

Fusarium Head Blight 3

Hessian Fly *Resistant*

Dryland Foot Rot 3

Comparison Chart Value: 9.....1
Poor.....Excellent

Agronomics

Maturity	Medium to late
Test Weight	Very good
Seed Size	Medium
Height	Medium
Straw Strength	Good
Head Type	Awned
Tillering	Very good
Planting Date	Average
Emergence	Very good
Protein	Very good
Moisture Zone	All

Note: these agronomic assessments are made by Syngenta scientists and reflect each variety's relative performance within these characteristics though the 2019 crop year. Specific conditions may cause variations within characteristics. These relative protection values are based on current pest and disease populations and have been known to shift periodically and may cause changes in specific evaluations. Resistance to many other diseases and pests is sensitive to environmental conditions, plant development stages and the presence and intensity of other diseases which may result in specific evaluation inconsistencies. This chart is updated annually to reflect the most current trends. ©2020 Syngenta.
