GENERAL:

- Relative Maturity:
1 = Excellent to Excellent
2 = Very Good to Excellent
3 = Very Good
4 = Very Good to Good
5 = Good
6 = Fair to Good
7 = Fair
8 = Fair to Poor
9 = Poor
— = Not available

Note: these agronomic assessments are updated annually by Syngenta scientists. The current values reflect each variety's relative performance within those characteristics through the 2019 crop year. Specific conditions may cause variations. These relative protection values are based on current pest and disease populations, known to shift periodically potentially changing specific evaluations. Resistance to many other diseases and pests is sensitive to environmental conditions, plant development stages and the presence and intensity of other diseases which may result in specific evaluation inconsistencies.

* Everest has a fusarium head blight (FHB) rating of four.

AgriPro®
Winter Wheat Seed Guide

syngenta®

New! SY Wolverine

Tenacious Yielder Across the Plains

- Outstanding yield performance—exceeds SY Monument and SY Sunrise
- Medium-early maturity with strong straw
- Improved wheat streak tolerance
- Broadly adapted

Maps indicate area of primary adaptation

AgriPro brand varieties from Syngenta deliver agronomic traits you need for superior performance.

Developed by North America's largest breeding program, AgriPro® varieties are locally bred with your acres in mind. Available as certified seed grown and distributed by local AgriPro associates. For more information, call your local AgriPro Associate or visit AgriProWheat.com

SY 517 CL²

Winter Hardy Two-Gene

- Excellent low pH tolerance
- Good straw strength
- Moderate tolerance to fusarium head blight
- Good winter hardiness
- Beyond® herbicide tolerance

Bob Dole

Leading Rust Resistance

- Very good rust tolerance—leaf and stripe
- Consistent performance over years
- Excellent end-use quality
- Excellent fall forage for grazing

SY Monument

Disease and Drought Tolerance

- #1—Planted on more acres than any other wheat variety in the Plains
- Ideal choice for double crop following soybeans
- Tolerance to acid soils and soil borne mosaic virus
- Good winter hardiness
- Very good tolerance to leaf and stripe rust
- Excellent mill and bake, strong mixing tolerance

Manage Winter Annual Grasses with Herbicide-Tolerant AgriPro Varieties

SY Achieve CL²

Earlier Maturity Two-Gene

- Early maturing variety
- Good stripe rust resistance
- Beyond® herbicide tolerance

SY Grit

Straw Strength and Drought Tolerance

- The best straw strength in our lineup
- Excellent yields—irrigated and dryland
- Good disease package
- High tonnage as wheat silage

SY Benefit

Fusarium Head Blight Tolerance

- Best for planting following corn
- Medium-early maturity, good aluminum tolerance for low pH soils

SY Rugged

The Dryland Performer

- High yields across environments
- Very good test weights
- Good rust tolerance—leaf and stripe
- Good drought tolerance
- Earlier maturity

Spur

Solid Stem for Wheat Stem Sawfly Protection

- Moderate resistance to stripe rust
- Later maturing variety, lower test weight

For local performance data, call your AgriPro Associate. A list of Associates is available at AgriProWheat.com.

New! AP18 AX

Excellent Yields, Wide Adaptation

- Broadly adapted
- Excellent yields
- Good winter hardiness in initial testing
- Aggressor® herbicide tolerance
