

SY Assure

Soft White Winter Wheat Variety
Strengthen Your Returns

Highlights

- Adapted for intermediate to high moisture areas
- Short height, with straw strength for irrigation
- Excellent tolerance to current strains of stripe rust
- Very early maturity, allowing for a flexible planting date

Agronomics

Maturity	Very early
Test Weight	Excellent
Seed Size	Medium
Height	Short
Straw Strength	Good
Head Type	Awned
Planting Date	Average to late
Emergence	Good
Seeding Rate	Lower than average

Disease and Pest Tolerance

Note: these agronomic assessments are made by Syngenta scientists and reflect each variety's relative performance within these characteristics though the 2020 crop year. Specific conditions may cause variations within characteristics. These relative protection values are based on current pest and disease populations and have been known to shift periodically and may cause changes in specific evaluations. Resistance to many other diseases and pests is sensitive to environmental conditions, plant development stages and the presence and intensity of other diseases which may result in specific evaluation inconsistencies. This chart is updated annually to reflect the most current trends. ©2020 Syngenta. **Some or all of the varieties may be protected under one or more of the following: Plant Variety Protection, United States Plant Patents and/or Utility Patents and may not be propagated or reproduced without authorization.** AgriPro® and the Syngenta logo are trademarks of a Syngenta Group Company.
