

AP Coachman

Soft White Spring Wheat Variety
Covers all the Bases

Highlights

- Quick emergence with vigorous spring growth
- Medium height and late maturity
- Hessian fly resistant with good tolerance to stripe rust
- Good end-use quality

Agronomics

Maturity	Late
Test Weight	Very good
Height	Medium
Head Type	Awned
Planting Date	Normal
Seed size	Medium
Emergence	Good
Moisture Zone	All

Disease and Pest Tolerance

Stripe Rust 3

Dryland Foot Rot 2

Hessian Fly *Resistant*

Comparison Chart Value 9.....1
Poor Excellent

Note: these agronomic assessments are made by Syngenta scientists and reflect each variety's relative performance within these characteristics though the 2021 crop year. Specific conditions may cause variations within characteristics. These relative protection values are based on current pest and disease populations and have been known to shift periodically and may cause changes in specific evaluations. Resistance to many other diseases and pests is sensitive to environmental conditions, plant development stages and the presence and intensity of other diseases which may result in specific evaluation inconsistencies. This chart is updated annually to reflect the most current trends. ©2022 Syngenta. **Some or all of the varieties may be protected under one or more of the following: Plant Variety Protection, United States Plant Patents and/or Utility Patents and may not be propagated or reproduced without authorization.** AgriPro® and the Syngenta logo are trademarks of a Syngenta Group Company.
