General:
 1 = Excellent
 2 = Very Good to Excellent
 3 = Very Good
 4 = Very Good to Good
 5 = Good

Relative Maturity:
 1 = Earliest
 9 = Latest
 6 = Fair to Good
 7 = Fair
 8 = Fair to Poor
 9 = Poor
 — = Not available

Plant Height:
 1 = Shortest
 9 = Tallest

Note: these agronomic assessments are updated annually by Syngenta scientists. The current values reflect each variety's relative performance within these characteristics through the 2021 crop year. Specific conditions may cause variations. These relative protection values are based on current pest and disease populations, known to shift periodically potentially changing specific evaluations. Resistance to many other diseases and pests is sensitive to environmental conditions, plant development stages and the presence and intensity of other diseases which may result in specific evaluation inconsistencies.

* Everest has a fusarium head blight (FHB) rating of four.

AgriPro – Industry-leading technology and performance for more than 40 years

Manage winter annual grasses with herbicide-tolerant AgriPro® brand varieties

New from the AgriPro brand for 2022

Industry Standards

AP18 AX

CoAXium® Wheat Production System

- Aggressor® herbicide tolerance
- Phenomenal yield potential
- Medium maturity
- One of the top varieties from the AgriPro brand for WSMV tolerance

SY 517 CL²

Winter Hardy Two-Gene

- Excellent low pH tolerance
- Very good to excellent straw strength
- Good winter hardiness
- Beyond® herbicide tolerance

SY Legend CL²

The Legend Starts Now

- Consistent yield performance across the western region
- Good leaf and stripe rust tolerance
- Good drought tolerance
- Beyond® herbicide tolerance

New! AP Bigfoot

Leading Yield Potential

- Acid soil tolerance
- Very good leaf and stripe rust tolerance
- Great choice if planting late after soybeans
- One of the top varieties from the AgriPro brand for WSMV tolerance

AP Solid

New! Solid Yield from Solid Stems

- Solid stems to help with sawfly management
- Excellent solidness score, confirmed by Montana State University
- Good yield potential in Western Nebraska, Eastern Colorado, and Montana
- Judee/SY Wolf pedigree

SY Monument

Time-Tested Consistency

- Great choice if planting late after soybeans
- Good forage production for grazing and silage
- Acid soil tolerance
- Listed on Grain Craft preferred variety list

SY Grit

Strong Standing

- Excellent straw strength
- Ideal for irrigated production
- Early maturity

Bob Dole

Healthy Biomass and Reliable Yield

- Excellent tolerance to leaf and stripe rust
- Consistent high yield potential
- Listed on Grain Craft preferred variety list

AP EverRock

Fall Forage with Top Yield Potential

- Excellent choice for planting early
- Very good to excellent straw strength
- Very good barley yellow dwarf tolerance
- Acid soil tolerance

● Irrigated

AP Roadrunner

Thrives in Harsh Conditions

- Late maturity
- One of the top varieties from the AgriPro brand for WSMV tolerance
- Leaf and stripe rust tolerance
- Hessian fly tolerance

Maps indicate area of primary adaptation

SY Rugged

The Dryland Performer

- Early maturity
- Short height
- Leaf and stripe rust tolerance

SY Wolverine

Tenacious Yield Potential

- High yield potential across a wide range of environments
- Great choice if planting late after soybeans
- One of the top varieties from the AgriPro brand for WSMV tolerance
- Not adapted to acid soils
