<b>SY Rugged</b>	2	4	3	2	4	3	3	3	1	5	7	6	—	3	8	6	6	7

**GENERAL:**

- 1 = Excellent or Best
- 2 = Very Good to excellent
- 3 = Very Good
- 4 = Very Good to Good
- 5 = Good
- 6 = Fair to Good
- 7 = Fair
- 8 = Fair to Poor
- 9 = Poor

\* Everest has a fusarium head blight (FHB) rating of four

**Maturity:**

- 1 = Earliest
- 9 = Latest

**Protein Content:**

- 1 = Highest
- 9 = Lowest

**Height:**

- 1 = Shortest
- 9 = Tallest

These agronomic assessments are made by Syngenta scientists and reflect each variety's relative performance within these characteristics through the 2021 crop year. Specific conditions may cause variations within those characteristics. These relative protection values are based on current pest and disease populations, which have been known to shift periodically and may cause changes in specific evaluations. Resistance to many other diseases and pests is sensitive to environmental conditions, plant development stages and the presence and intensity of other diseases which may result in specific evaluation inconsistencies. This chart is updated annually to reflect the most current trends.

## SOUTHERN PLAINS SEED GUIDE

**Herbicide Tolerant**

**AP18 AX**

**CoAXium® Wheat Production System**

- » Aggressor® herbicide tolerance
- » Phenomenal yield potential
- » Medium maturity
- » One of the top varieties from the AgriPro® brand for WSMV tolerance

**SY Achieve CL<sup>2</sup>**  
**The Early Two-Gene Grazer**

- » Beyond® herbicide tolerance
- » Excellent fall forage production
- » Early maturity

**Drought Tolerance**

**AP Roadrunner**

**Thrives in Harsh Conditions**

- » Late maturity
- » One of the top varieties from the AgriPro brand for WSMV tolerance
- » Leaf and stripe rust tolerance
- » Hessian fly tolerance

**SY Rugged**  
**The Dryland Performer**

- » Early maturity
- » Short height
- » Leaf and stripe rust tolerance

**Yield**

**New! AP Bigfoot**  
**Leading Yield Potential**

- » Acid soil tolerance
- » Very good leaf and stripe rust tolerance
- » Great choice if planting late after soybeans
- » One of the top varieties from the AgriPro brand for WSMV tolerance

Maps indicate area of primary adaptation

**SY Wolverine**  
**Tenacious Yield**

- » High yield potential across a wide range of environments
- » Great choice if planting late after soybeans
- » One of the top varieties from the AgriPro brand for WSMV tolerance
- » Not adapted to acid soils

**Versatile**

**SY Monument**

**Time-Tested Consistency**

- » Great choice if planting late after soybeans
- » Good forage production for grazing and silage
- » Acid soil tolerance
- » Listed on Grain Craft preferred variety list

[AgriProWheat.com](http://AgriProWheat.com)

**Forage and Silage**

**New! AP Longjack**  
**The New Generation of Awnless**

- » Best winter hardiness in the AgriPro® brand awnless lineup
- » Good straw strength
- » Medium-late maturity
- » Highest grain yielding awnless variety from AgriPro

**SY Razor**

**Quick Establishing Awnless**

- » Vigorous early growth for fall forage
- » Excellent biomass for silage
- » Very early maturity

**SY Grit**

**Strong Standing**

- » Excellent straw strength
- » Ideal for irrigated production
- » Early maturity

**Fusarium Head Blight Tolerance**

**SY Benefit**

**The Choice Following Corn**

- » Fusarium head blight tolerance
- » Acid soil tolerance

**Graze and Grain**

**AP EverRock**

**Fall Forage with Top Yield Potential**

- » Excellent choice for planting early
- » Excellent straw strength
- » Very good barley yellow dwarf tolerance
- » Acid soil tolerance

**Bob Dole**

**Healthy Biomass and Reliable Yield**

- » Excellent tolerance to leaf and stripe rust
- » Consistent high yield potential
- » Listed on Grain Craft preferred variety list

**Industry-leading technology and performance for more than forty years**

**AgriPro®**
