GENERAL:

- 1-2 = Excellent
- 3-4 = Very Good
- 5 = Good
- 6-7 = Fair
- 8-9 = Poor

Maturity:

- 1 = Earliest
- 9 = Latest

Height:

- 1 = Shortest
- 9 = Tallest

* Everest has a fusarium head blight (FHB) rating of four

These agronomic assessments are made by Syngenta scientists and reflect each variety's relative performance within these characteristics through the 2022 crop year. Specific conditions may cause variations within those characteristics. These relative protection values are based on current pest and disease populations, which have been known to shift periodically and may cause changes in specific evaluations. Resistance to many other diseases and pests is sensitive to environmental conditions, plant development stages and the presence and intensity of other diseases which may result in specific evaluation inconsistencies. This chart is updated annually to reflect the most current trends.

2023 Southern Plains Wheat Seed Guide

AgriPro®

2023

SOUTHERN PLAINS

SEED GUIDE

Graze and Grain

AP EverRock

Fall Forage with Top Yield Potential

- » Excellent choice for planting early
- » Excellent straw strength
- » Very good barley yellow dwarf tolerance
- » Acid soil tolerance

Bob Dole

Healthy Biomass and Reliable Yield

- » Excellent tolerance to leaf and stripe rust
- » Consistent high yield potential
- » Listed on Grain Craft preferred variety list

Drought Tolerance

AP Roadrunner

Thrives in Harsh Conditions

- » Late maturity
- » One of the top varieties from the AgriPro® brand for WSMV tolerance
- » Leaf and stripe rust tolerance
- » Hessian fly tolerance

SY Rugged

The Dryland Performer

- » Early maturity
- » Short height
- » Leaf and stripe rust tolerance

Versatile

SY Monument

Time-Tested Consistency

- » Great choice if planting late after soybeans
- » Good forage production for grazing and silage
- » Acid soil tolerance
- » Listed on Grain Craft preferred variety list

Herbicide Tolerant

AP18 AX

CoAXium® Wheat Production System

- » Aggressor® herbicide tolerance
- » Phenomenal yield potential
- » Medium maturity
- » One of the top varieties from the AgriPro brand for WSMV tolerance

Yield

New! AP Prolific

Prolific Production and Potent Traits

- » Very good fusarium head blight (scab) tolerance
- » Excellent leaf and stripe rust tolerance
- » Low pH tolerance
- » High tillering

AP Bigfoot

Leading Yield Potential

- » Acid soil tolerance
- » Very good leaf and stripe rust tolerance
- » Great choice if planting late after soybeans
- » One of the top varieties from the AgriPro brand for WSMV tolerance

SY Wolverine

Tenacious Yield Potential

- » High yield potential across a wide range of environments
- » Great choice if planting late after soybeans
- » One of the top varieties from the AgriPro brand for WSMV tolerance
- » Not adapted to acid soils

Forage and Silage

AP Longjack

The New Generation of Awnless

- » Best winter hardiness in the AgriPro® brand awnless lineup
- » Good straw strength
- » Medium-late maturity
- » Highest grain yielding awnless variety from AgriPro

SY Razor

Quick Establishing Awnless

- » Vigorous early growth for fall forage
- » Excellent biomass for silage
- » Very early maturity

SY Grit

Strong Standing

- » Excellent straw strength
- » Ideal for irrigated production
- » Early maturity

Industry-leading
technology and
performance for more
than forty years
