GENERAL:

1-2 = Excellent

3-4 = Very Good

5 = Good

6-7 = Fair

8-9 = Poor

— = Not available

Note: these agronomic assessments are updated annually by Syngenta scientists. The current values reflect each variety's relative performance within these characteristics through the 2023 crop year. Specific conditions may cause variations. These relative protection values are based on current pest and disease populations, known to shift periodically, potentially changing specific evaluations. Resistance to many other diseases and pests is sensitive to environmental conditions, plant development stages and the presence and intensity of other diseases which may result in specific evaluation inconsistencies.

* Everest has a fusarium head blight (FHB) rating of four.

AgriPro—Industry-leading technology and performance for more than 40 years

Forage Wheat

AP Baldy

Cattlemen's Choice

- Awnless forage wheat
- Very good winter hardiness
- Long-lasting green leaf duration
- Good choice for early planting—excellent barley yellow dwarf virus tolerance

Drought Tolerance

AP Roadrunner

Thrives in Harsh Conditions

- Late maturity
- One of the top varieties from the AgriPro brand for WSMV tolerance
- Leaf and stripe rust tolerance
- Hessian fly tolerance

Sawfly Fighter

AP Solid

New! Solid Yield from Solid Stems

- Solid stems to help with sawfly management
- Excellent solidness score, confirmed by Montana State University
- Good yield potential in Western Nebraska, Eastern Colorado, and Montana
- Judee/SY Wolf pedigree

Yield

AP Prolific

Prolific Production and Potent Traits

- Very good fusarium head blight (scab) tolerance
- Excellent leaf and stripe rust tolerance
- Low pH tolerance
- High tillering

AP Bigfoot

Leading Yield Potential

- Acid soil tolerance
- Very good leaf and stripe rust tolerance
- Great choice if planting late after soybeans
- One of the top varieties from the AgriPro brand for WSMV tolerance

SY Wolverine

Tenacious Yield Potential

- High yield potential across a wide range of environments
- Great choice if planting late after soybeans
- One of the top varieties from the AgriPro brand for WSMV tolerance
- Not adapted to acid soils

CoAXium Production System

New! AP24 AX

The Next Generation CoAXium®

- Aggressor® herbicide tolerance for the control of grassy weeds
- The next step in yield potential
- Medium maturity
- Intermediate tolerance to soilborne mosaic virus and low pH soils

AP18 AX

CoAXium® Wheat Production System

- Aggressor® herbicide tolerance
- Phenomenal yield potential
- Medium early maturity
- One of the top varieties from the AgriPro brand for WSMV tolerance
- Listed on Grain Craft and Scoular preferred variety list

Herbicide Tolerant

SY 517 CL²

Winter Hardy Two-Gene

- Excellent low pH tolerance
- Very good to excellent straw strength
- Good winter hardiness
- Beyond® herbicide tolerance

SY Legend CL²

The Legend Starts Now

- Consistent yield performance across the western region
- Good leaf and stripe rust tolerance
- Good drought tolerance
- Beyond® herbicide tolerance

Versatile

SY Monument

Time-Tested Consistency

- Great choice if planting late after soybeans
- Good forage production for grazing and silage
- Acid soil tolerance
- Listed on Grain Craft and Scoular preferred variety list
