GENERAL:
 1-2 = Excellent
 3-4 = Very good
 5 = Good

6-7 = Fair
 8-9 = Poor
 — = Not available

Relative Maturity:
 E = Early
 M = Medium
 L = Late

Plant Height:
 S = Short
 M = Medium
 T = Tall

Coleoptile Length:
 S = Short
 M = Medium
 L = Long

Note: these agronomic assessments are updated annually by Syngenta scientists. The current values reflect each variety's relative performance within these characteristics through the 2024 crop year. Specific conditions may cause variations. These relative protection values are based on current pest and disease populations, known to shift periodically potentially changing specific evaluations. Resistance to many other diseases and pests is sensitive to environmental conditions, plant development stages and the presence and intensity of other diseases which may result in specific evaluation inconsistencies.

* Everest has a fusarium head blight (FHB) rating of four.
