

# AgriPro HY162

**Hybrid** Hard Red Spring Wheat

## Highlights

- Consistent, high yield potential throughout the Northern Plains
- Similar agronomics to SY Valda, but with an earlier finish
- Excellent end-use quality
- 80% seeding rate compared to normal

## Agronomics

Maturity	Medium
Test Weight	Excellent
Protein	Fair
Height	Medium-Tall
Straw Strength	Good

## Disease and Pest Tolerance

## Area of Adaption

## Two-Year Yield Trial Summary

Syngenta Data, 2023-2024

Variety	Yield Bu/A	% Yield of SY Valda	Test Weight lb/a	Protein %	Maturity	Height	Straw Strength
<b>AgriPro HY162</b>	<b>91.6</b>	<b>106</b>	<b>59.9</b>	<b>13.8</b>	<b>5</b>	<b>6</b>	<b>5</b>
AgriPro HY141	90.6	105	59.6	14.1	5	6	6
SY Valda	86.3	100	59.2	14.2	7	5	5

**Note:** these agronomic assessments are made by Syngenta scientists and reflect each variety's relative performance within these characteristics through the 2024 crop year. Specific conditions may cause variations within characteristics. These relative protection values are based on current pest and disease populations and have been known to shift periodically and may cause changes in specific evaluations. Resistance to many other diseases and pests is sensitive to environmental conditions, plant development stages and the presence and intensity of other diseases which may result in specific evaluation inconsistencies. This chart is updated annually to reflect the most current trends.
