

AgriPro HY141

Broadly-Adapted Hybrid with
Excellent Yield

AgriPro HY155

High Protein with Yield for
Eastern North Dakota and
Western Minnesota

AgriPro HY162

A High-Yielding Hybrid for
Western North Dakota

Hybrid Agronomics

Yield	Excellent
Test Weight	Excellent
Plant Height	Medium-Tall
Straw Strength	Good
Maturity	Medium

2026

NORTHERN PLAINS
SPRING WHEAT
SEED GUIDE

syngenta®

The AgriPro® brand is the first to bring commercial hybrid wheat seed and all of its benefits to farmers. Hybrid wheat is set to revolutionize high-value wheat production by increasing yield potential and consistency, advancing agronomics, reducing risk, and improving grower ROI.

Hybrid Highlights

- Consistent, high yield potential—**on average 5 bushels more than SY Valda**—throughout the Northern Plains
- 80% seeding rate compared to normal
- Similar agronomics to SY Valda, but with an earlier finish
- Emerges quickly and canopies early to compete with weeds—vigorous plant type

Use the QR code to sign your Seed Stewardship Agreement or visit <https://agriprowheat.com/stewardship>

AgriPro Hybrids require a Seed Stewardship Agreement specifying No Saved Seed.

2026 AgriPro Spring Wheat Comparison Chart

	Test Weight	Protein	Heading	Maturity	Height	Straw Strength	Stem Rust	Leaf Rust	Foliar Disease	FHB	BLS

General
1-2 = Excellent
3-4 = Very Good
5 = Good
6-7 = Fair
8-9 = Poor

Protein Content:
1 = Highest
9 = Lowest

Maturity:
1 = Earliest
9 = Latest

Height:
1 = Shortest
9 = Tallest

These agronomic assessments are made by Syngenta scientists and reflect each variety's relative performance within these characteristics through the 2025 crop year. Specific conditions may cause variations within those characteristics. These relative protection values are based on current pest and disease populations, which have been known to shift periodically and may cause changes in specific evaluations. Resistance to many other diseases and pests is sensitive to environmental conditions, plant development stages and the presence and intensity of other diseases which may result in specific evaluation inconsistencies. This chart is updated annually to reflect the most current trends.

AP Iconic and AgriPro Hybrids require a Seed Stewardship Agreement specifying No Saved Seed .

New for 2026

AP Iconic

Next-Gen Yield Leader

- »Top-yielding AgriPro variety across North Dakota and Minnesota, three-year data
- »Solid protein potential
- »Very good straw strength
- »Very good fusarium head blight (scab) and bacterial leaf streak tolerance

AP Iconic requires a Seed Stewardship Agreement. Planting of farmer-saved seed is prohibited (Certified Seed Only).

New for 2026

AP Dagr

Top-End Yield Potential

- »Broadly adapted in the Northern Plains, with exceptional yield record in South Dakota
- »SY Valda pedigree
- »Very good bacterial leaf streak (BLS) tolerance
- »Good straw strength

Ratings based on field observations from multiple locations and multiple years. Ratings are not absolute and may change as additional data are collected or environmental conditions change.

Yield

AP Elevate

Elevating Wheat Yield Potential

- »Excellent combination of yield and protein potential
- »Very good straw strength
- »Excellent harvestability
- »Strong fusarium head blight and bacterial leaf streak tolerance

AP Gunsmoke CL²

Double-Barreled Performance

AP Murdock

Yield Muscle and Early Maturity

SY 611 CL²

High Yields with Herbicide Tolerance

SY Valda

Consistent Yields and Protein

Protein

AP Smith

Stands Strong

Sawfly Control

SY Longmire

Solid Stem Built to Yield
