AP24 AX

Peak Production Protected

- »Aggressor® herbicide tolerance for control of winter annual grasses
- »Exceptional yield performance
- »Very good wheat streak mosaic virus tolerance

Test Weight	Very Good
Winter Hardiness	Very Good
Plant Height	Medium
Relative Maturity	Medium
Mill & Bake Quality	Acceptable
WSMV	Very Good
Acid Soil Tolerance	Fair

Management Notes

AP24 AX is a CoAXium® wheat with improved tolerance to Aggressor herbicide. Agronomic and disease tolerances are similar to AP18 AX. A close comparison will show AP24 AX to be slightly later in maturity and slightly taller in height, but still well within a medium classification for both. Use caution on low pH soils that may have toxic levels of plant-available aluminum. Aluminum toxicity can often be overcome by applying a phosphorus starter fertilizer. Like all CoAXium wheats, producers are prohibited from saving seed and a stewardship agreement must be signed prior to purchase.

AP Prolific

Yield Performance with FHB (Scab) Tolerance

- »Best-in-class fusarium head blight tolerance
- »Exceptional yield performance
- »High tillering

Test Weight	Excellent
Winter Hardiness	Very Good
Plant Height	Medium
Relative Maturity	Medium
Mill & Bake Quality	Acceptable
WSMV	Very Good
Acid Soil Tolerance	Excellent

Management Notes

AP Prolific is a farmer favorite across the central plains. Producers are enjoying top-end yield performance with disease and pest tolerances ideally suited to the region. Named for its prolific tillering, AP Prolific is an excellent dual-purpose wheat. When planting on time into ideal soil conditions, slightly reduced seeding rates have not hindered yield. Best-in-class fusarium head blight tolerance, excellent for those with corn in the crop rotation. Tolerance to stripe rust remains good, but was reduced by the 2024 race change. A fungicide application at flag leaf is encouraged.

AgriPro®

AP Sunbird

Great Plains Yield

- »High yield potential in grain, silage, and forage production systems
- »Excellent test weight
- »Very good wheat streak mosaic virus tolerance

Test Weight	Excellent
Winter Hardiness	Very Good
Plant Height	Short
Relative Maturity	Early
Mill & Bake Quality	Excellent
WSMV	Very Good
Acid Soil Tolerance	Very Good

Management Notes

AP Sunbird is an early-maturing variety with outstanding grain yield potential in the western plains and under irrigation. Grain quality is excellent for milling and baking. Use a fungicide at flag leaf to manage stripe rust. Best-in-class tolerance to wheat streak mosaic virus, but remain diligent in controlling volunteer wheat. A growth regulator may be warranted to minimize the risk of lodging where yield goals exceed 85 bushels per acre. Exceptional performance in forage and silage trials.

Syngenta Performance Trial data available at AgriProWheat.com

AgriProWheat.com

These agronomic assessments are made by Syngenta scientists and reflect each variety's relative performance within these characteristics through the 2025 crop year. Specific conditions may cause variations within those characteristics. These relative protection values are based on current pest and disease populations, which have been known to shift periodically and may cause changes in specific evaluations. Resistance to many other diseases and pests is sensitive to environmental conditions, plant development stages and the presence and intensity of other diseases which may result in specific evaluation inconsistencies. This chart is updated annually to reflect the most current trends.

* Everest has a fusarium head blight (FHB) rating of four

GENERAL:
1-2 = Excellent
3-4 = Very Good
5 = Good
6-7 = Fair
8-9 = Poor

Maturity:
E = Early
M = Medium
L = Late

Height:
S = Short
M = Medium
T = Tall

Coleoptile Length:
S = Short
M = Medium
L = Long

A Proven Portfolio of Powerful Performance

AP Bigfoot

Dryland Durability

- » Consistently good western dryland yield performance
- » Excellent test weight
- » Very good wheat streak mosaic virus tolerance

SY Wolverine

Versatile Performance

- » Outstanding performance across management systems
- » Excellent straw strength
- » Very good wheat streak mosaic virus tolerance
