CV (Effective)	7.4		7.7		6.7		5.2	6.4	10.3

Boldfaced numbers are within confidence interval at specific locations and combined years of yield data.

Locations

2024 — Belleville, Conway Springs, Junction City, and Salina, KS

2025 — Belleville, Junction City, and Salina, KS

2026 — Belleville and Junction City, KS

2026 Notes

Belleville, KS — Very good yields despite later than usual topdress. Extremely clean data.

Junction City, KS — Good yields overall despite heavy freeze damage early in the spring. Field variation due to compaction patterns was worrisome but in the end, data was good.

South Haven, KS — New location for 2026. Lower yields but overall clean data. Planted directly into barely ready to harvest soybean stubble.

Locations not included: Nickerson, KS (freeze damage), Salina, KS (heavy shattering due to >100 mph winds)
